Selective collection Evolution

 We have reached 40 % of total selective collection

New target 

We have been at the same level for 5 years

Main 2020 objectives

Within the framework of the Circular Economy package and the European and National legislation, we have a new Waste Management Plan with these main objectives for 2020:

- Decrease the **generation** of municipal, industrial and construction waste by at least **15%** by weight compared to 2010.
- Achieve a selective **collection** rate of **60%** for municipal waste
- Improve the **quality** of waste collected to increase the recovery rate
 - Biowaste impurities < 10% by weight
 - Packaging impurities < 25% by weight

We know what we want to achieve but we don't know exactly how to do it
This is a good opportunity to launch a PPI process

PPI budget and main steps

Budget: 20.000.000 €, 50% from **European Regional Development Fund**
ERDF

Challenges identification (April)

Market consultation (May – June)

Pilots definition (September)

Municipalities selection (April 2018)

Pilots implementation (End 2018/2019)
